Re: PSC Docket 13-250

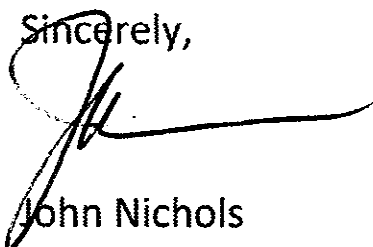

Dear Ms. Bentley,

I am requesting status as an intervener in the above referenced Public Service Commission docket regarding utility bill transparency.

I request this status because of my unique knowledge of, and interest in, energy issues affecting Delaware. I do not believe my interests will be adequately represented by the parties to the proceeding because I do not believe they have the same interest that I do regarding the cost of renewable energy. More specifically, my intervention is in the public interest because of my in-depth knowledge of renewable energy legislation and initiatives, and I seek to have these initiatives clearly explained on utility bills.

Thank you for your consideration in this matter

Sincerely,

John Nichols
